

LUXEON Z Color Line

High power color LEDs in a micro footprint package for ultimate design flexibility

The LUXEON Z Color Line comprises a broad portfolio of LEDs that enable never before seen lumen density, flexibility and freedom of design. Available in the full spectrum of colors from 440nm to 670nm, including Lime, enabling highly efficient color mixing with a convenient above-blackbody color point. The LUXEON Z Color Line is ideal for entertainment and stage lighting, indoor and outdoor architectural lighting, emergency vehicle lighting, remote phosphor applications and a wide spectrum of specialty lighting applications.

FEATURES AND BENEFITS

- Broad selection spanning 440–670nm, including a unique Lime color
- 2.2mm² footprint enables unique arrangements in space constrained applications
- 4-up RGBW pixel in 9.5mm² — four colors in less area than one regular high power color emitter
- Undomed design allows better optical management
- Enables customizable light sources: linear, rectangular, circular

PRIMARY APPLICATIONS

- Architectural
- Lamps
 - Remote Phosphor
- Specialty Lighting

General Product Information

Product Test Conditions

LUXEON Z Color Line LEDs are tested and binned with a DC drive current of 500mA at a junction temperature, T_j , of 25°C or 85°C, depending on the product.

Part Number Nomenclature

Part numbers for LUXEON Z Color Line follow the convention below:

L X Z 1 – P **A** 0 **B**

Where:

- A** – designates color (A=Deep Red, D=Red, H=Red-Orange, L=Amber and PC Amber, X=Lime, M=Green, E=Cyan, B=Blue and R=Royal Blue)
- B** – designates color version (example: 1, 2, 3)

Therefore, the following part number is used for a LUXEON Z version 2 Red:

L X Z 1 – P **D** 0 **2**

Lumen Maintenance

Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON Z Color Line is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Notes for Table 2:

- Spectral width at ½ of the peak intensity.
- Total angle at which 90% of total luminous flux is captured.
- Viewing angle is the off axis angle from the LED centerline where the luminous intensity is ½ of the peak value.
- All Deep Red, Red, Red-orange and Amber products are built with Aluminum Indium Gallium Phosphide (AlInGaP).
- All PC Amber, Lime, Green, Cyan, Blue and Royal Blue products are built with Indium Gallium Nitride (InGaN).
- Wavelength ranges for hot tested Red, Red-Orange and Amber have been defined to align with typical changes in spectral output at increased temperature, which are inherent to AlInGaP LEDs. At T_j=25°C these hot-tested parts will have the same typical spectral outputs as their cold-tested counterparts.

Autoclave Conditions	-121°C at 2 ATM	100% Relative Humidity for 96 hours Maximum
Reverse Voltage (V_{reverse})	LUXEON LEDs are not designed to be driven in reverse bias	

Notes for Table 4a:

1. Proper current derating must be observed to maintain junction temperature below the maximum.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple," with frequencies $\geq 100\text{Hz}$ and amplitude $\leq 15\%$ of the maximum allowable DC forward current are acceptable, assuming the average current throughout each cycle does not exceed the maximum allowable DC forward current at the corresponding maximum junction temperature.
3. Pulsed operation with a peak drive current equal to the stated peak pulsed forward current is acceptable if the pulse on-time is $\leq 5\text{ms}$ per cycle and the duty cycle is $\leq 50\%$.

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

Reels of LUXEON Z Deep Red, Red, Red-Orange, Amber, Lime, Green, Cyan, Blue and Royal Blue are labeled using a 3-digit alphanumeric CAT code following the format below.

A B C

- A** – designates luminous flux or radiometric power bins (example: K=96 to 104 lumens, V=194 to 204 lumens)
- B** – designates peak or dominant wavelength bin (example: Green 2=525 to 530nm, Cyan 7=495 to 500nm, Blue 4=475 to 480nm)
- C** – designates forward voltage bin (example: 2=2.50 to 2.75V, 6=3.00 to 3.25V)

Therefore, a LUXEON Z Green LED with a lumen range of 96 to 104, a dominant wavelength of 525 to 530nm and a forward voltage range of 2.50 to 2.75V has the following CAT code:

K 2 4

Reels of LUXEON Z PC Amber are labeled using a 4-digit alphanumeric CAT code following the format below.

A B C D

- A** – designates luminous flux bin (example: K=96 to 104 lumens, L=104 to 114 lumens)
- B C** – designates peak wavelength bin (example: A1)
- D** – designates forward voltage bin (example: 3=2.25 to 2.50V, 5=2.75 to 3.00V)

Therefore, a LUXEON Z PC Amber LED with a lumen range of 104 to 114, color bin of A1 and a forward voltage range of 2.75 to 3.00V has the following CAT code:

L A 1 5

Luminous Flux Bins

Table 5a and Table 5b list the standard luminous flux bins for LUXEON Z Color Line emitters. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all CCTs.

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world better, safer, more beautiful—with light.
