SOT404 Auto Standardisation to Osiris leadframe without hole

Information Notification

NXP intends to standardise the Osiris Leadframe to version without the hole feature in the Gate T-Post for all TrenchMOS 4 SOT404 Automotive device types.

NXP have been using both versions of the Osiris Leadframe with and without the hole, without any issue, and therefore would like to inform customers of this standardisation of Leadframe version to the Osiris Leadframe which does not have a hole in the Gate T-Post.

Why do we issue this Information Notification

Standardisation of Leadframe design.

Identification of Affected Products

Product identification does not change

Impact

no impact to the product's functionality anticipated.

No change to form, fit or function

Data Sheet Revision

No impact to existing datasheet

Disposition of Old Products

Existing inventory will be shipped until depleted

Additional information

Affected products and sales history information: see attached file
