

Product brief

TLE9104SH

4-channels high-current/energy powertrain low-side switch

The TLE9104SH is a smart 4-channel low-side switch in Smart Power Technology designed for automotive powertrain applications and it's equipped with a 16-bit Serial Peripheral Interface (SPI) for control and diagnosis. All channels are protected against overcurrent/temperature and enhanced with an active clamping circuitry for driving inductive loads. Load status detection is possible over the SPI for: Short to Ground (SCG), Open Load (OL), and Short to Battery (SCB). 4 input pins are available for direct control of the switches.

The TLE9104SH comes along with important safety features, which makes it a good fit to safety critical automotive and industrial applications.

The TLE9104SH is particularly suitable for engine management, transmission control and battery management systems where high-current/high-energy actuators have to be controlled.

Applications

- > Automotive powertrain, body and safety applications
- > Engine management, transmission control and battery management
 - Driving resistive/inductive loads (solenoids, injectors, valves, relays)
- > Industrial applications

Performance TLE9104SH

The TLE9104SH is a 4-channel high-current/energy low-side switch for various automotive powertrain, body and safety applications.

Key features

- > 16-bit SPI at 8 MHz
- > 4x direct input pins
- > $V_{DS(CL)}$: 50 ... 60 V (int. clamping)
- > $R_{DS(on)}$: 300 m Ω (@ 150°C)
- > 3 A nominal load current
- > 5 A peak current
- > VIO pin for 3.3 V and 5.5 V SPI
- > Independent on-state and off-state diagnostic functions
- > Configurable overcurrent protection
- > Extra output EN pin
- > SPI communication watchdog
- > Output stage status via SPI
- > Green product (RoHS compliant)
- > Completely lead free
- > AEC-Q100/101/006 qualified

Key benefits

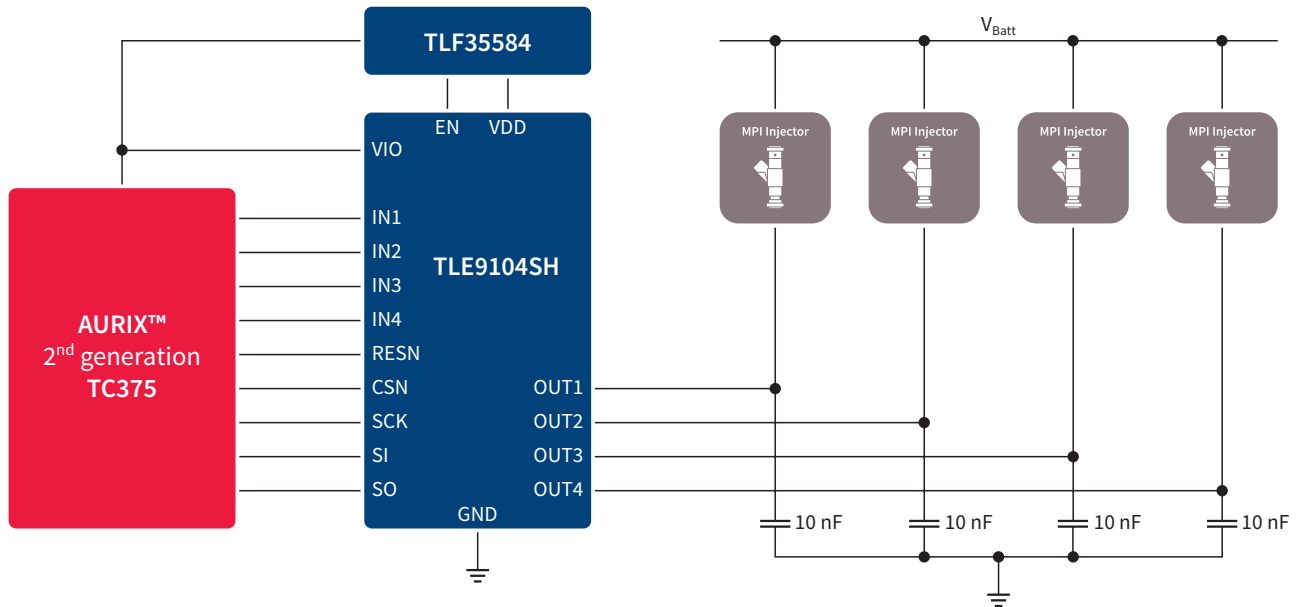

- > High-current/energy capability
- > Flexible due to configurability
- > Cost and size optimized package
- > Protection and diagnosis functions
- > Enhanced safety features

TLE9104SH

4-channels high-current/energy powertrain low-side switch

Block diagram

The DSO-20 (Heatslug) package

- > Small footprint (68 mm²)
- > 0.5 mm pitch
- > Unparalleled thermal performance R_{thJC} of 1 K/W
